From the Louisville Journal. To We are sure that a husband, so

Dearest, come home! I cannot bear Thy long protracted stay, So sad and lonely is my heart When thou art gone away. I've tried, alas! how vainly tried, Thine absence to forget, Yet still I can but think of thee With fondness and regret.

As mourns the gentle, cooling dove, In accents desolate, When forced by some unkindly har Far from her loving mate -So through the chambers of my hear Echoes a mournful tone, Whilst every pulse affection beats, Re-echoes "I'm alone!"

Things that are bright when thou ar here, Look dark and gloomy now, And nature seems to share my grief Which clouds upon her brow. The birds sing now a sadder song

Than e'er they sang before, And flowers have lost the sunny hue They once so sweetly wore. To while the weary hours away, That lag with laden feet, I read thy favorite authors o'er,

Their choicest parts repeat. But even books, those voiceless friends, Have lost all charm for me, And fail to cheer my heart, unless I read them, love, with thee.

And music, with her voice so sweet I've called her to my aid, And soft, and low, with trembling

Thy favorite air I've played. But ah! those tender notes have stirred Affection's fountain deep, And sadly I have left my song To think of thee and weep.

Thus gloomy thoughts their dismal O'er brightest objects fling,

How true it is a saddened heart Can sadden everything! Then, dearest, come-thy wife's fond heart Still warmly beats for you-

A heart whose every throbbing pulse Is faithful, kind, and true, M. BARDSTOWN, Oct. 18, 1850.

At a meeting of the Massachusetts Charitable Mechanic Association, held in Lowell, a few evenings since. the following beautiful ode, which had been composed for the occasion by Epes Sargent, was sung:

The camp has had its day of song: The sword, the bayonet, the plume Have crowded out of rhyme too long The plough, the anvil, and the loom! O, not upon our tented fields Are Freedom's heroes bred alone; The training of the work-shop yields

More heroes true than War has known! Who drives the bolt, who shapes the steel,

May, with a heart as valiant, smite, As he who sees a foeman reel In blood before his blow of might! The skill that conquers space and time That graces life, that lightens toil, May spring from courage more sublim-Than that which makes a realm its spoil.

Lat labor, then, look up and see, His craft no pith of honor lacks; The soldier's rifle yet shall be ess honored than the woodman's axe Let Art his own appointment prize, Nor deem that gold or outward height Can compensate the worth that lies In tastes that breed their own delight.

And may the time draw nearer still When men this sacred truth shall heed That from the thought and from the will Must all that raises man proceed! Though Pride should hold our calling

For us shall duty make it good; And we from truth to truth shall go Till life and death are understood.

Correspondence of the New York Tribune. The American Artic Expedition LETTER FROM E. K. KANE.

Lancaster Sound, between Cape Crawford and York, Wednesday, August 21.

13 00 valleys we passed were the nests of still. The person getting up a club of TEN remarkable glaciers, and the ice genmy stock of observation on refractopen, and were momentarily expectistarboard beam. tion. I have now some forty quarto ting to shape our course for Lancaspages of them.
